

NOBELTECH[®]

The future of your terroir

NEW
TECHNOLOGY &
NEW PRODUCT

M·A·SILVA
Premium Cork Stoppers

At the core of this new technology and product from M.A.SILVA lies naturally the world's finest cork, sourced 100% from the Iberian Peninsula.

This noble material undergoes processing through innovative technology that integrates three advanced systems to achieve an unparalleled premium result.

The company prides itself on its complete vertical integration, ensuring total control over every stage of production, from cork harvesting to cork manufacturing.

BIONICEYE®

AI & Machine Learning

More sustainable fewer processes, more efficiency

State-of-the-art ultra-sensitive camera

Technology 5.0 physical-mechanical assurance and grading through AI & Machine learning

SARAADVANCED®

Sensory Uniformity

Extraction of volatiles and sensory uniformity

Controlled temperature, pressure and dry steam

Continuous and automatic process

Elastic memory of cork is used and maintained

RAYSYSTEM®

Thermal Radiation

Irradiation thermal gradient that enhances TCA extraction

Temperature thermal TCA and other volatiles desorption

The best extraction solution on the market

It elevates M.A.SILVA above the competition ensuring the most accurate **PREMIUM** option in the market.

CO₂ BALANCE
-267.7g
per stopper
